

CASP, Part 7 of 9: Risk Management

page 1

Meet the expert: David Bigger is the lead trainer at Bigger IT Solutions. He has been information technology for a little over 20 years and has been training all over the US. He has worked with companies like US Military, Lockheed Martin, General Dynamics, Dominos Pizza, University of Utah and Expedia

Prerequisites: This course assumes that the student has familiarity with information technology and basic networking. The student should also be familiar with basic security concepts, whether through the CompTIA Advanced Security Practitioner Parts 1-6 or outside study. No scripting or “hacking” experience is required.

Runtime: 58:23

Course description: Are you worried something may happen to your network or your data? Explore the intricacies of risk determination and risk assessment associated with being a CompTIA Advanced Security Practitioner as well as the mitigation strategies used to solve potential problems, such as accepting or transferring risk. Also, take a look at business continuity plans, including BCP, DRP, and BIA, that can be executed if things get bad. This course is part of a series covering the CompTIA Advanced Security Practitioner (CASP).
