

Jenkins, Part 2 of 7: Docker and AWS

page 1

Meet the expert: Ricardo is a Red Hat certified engineer and systems administrator, cloud architect and linux specialist. He has taught students around the world and is passionate about process automation, and tools to make infrastructure as code to create efficient architecture solutions.

Prerequisites: Basic GNU/LINUX knowledge is nice to have, but not required.
A computer that supports Virtualization.
Internet connection
Basic Docker understanding is nice to have, but not required.

Runtime: 01:09:57

Course description: Jenkins is open source automation software that helps automate software development with continuous integration and facilitating technical aspects of continuous delivery. This course starts with using Docker as well as how to use SSH to connect and then an introduction to Amazon Web Services as well as creating buckets, users and jobs in Jenkins.

Course outline:

Docker SSH

- Introduction
- Docker SSH
- Summary

- Summary

SSH Plugin

- Introduction
- SSH Plugin
- SSH Integration
- Run Command Over SSH
- Summary

Intro AWS Jenkins

- Introduction
- Intro AWS Jenkins
- Create Mysql Docker
- MySQL Client AWS CLI
- Create Mysql DB
- Summary

Create Bucket and User

- Introduction
- Create Bucket
- Create IAM User
- Dump And Upload Manually S3
- Automate Dump Mysql
- Full Working Script S3
- Sensitive Data
- Summary

Create Jenkins Job

- Introduction
- Create Jenkins Job
- Execute Job And Be Happy
- Permanent Script
- Change Jenkins Parameters
Bucket
