

Microsoft Excel 2016, Part 1 of 6: Get Acquainted with the Environment

page 1

Meet the expert: LeeAnne McManus is a nationally renowned trainer, facilitator, and productivity expert who has conducted thousands of sessions over the past decade. While widely recognized for helping end-users, departments, and organizations learn how to maximize their software products, most notably Office 365 and Adobe, LeeAnne also facilitates sessions to enhance productivity and performance through soft skills development. Her professional background includes Human Resources, Operations, and Talent and Development.

Prerequisites: This course assumes that students are familiar with the basic use of Windows and common use of the mouse and keyboard. No prior experience with Excel is assumed.

Runtime: 01:54:28

Course description: In this introductory course, Microsoft Office expert LeeAnne McManus will walk through the fundamental features of Excel including navigating the ribbon tabs and utilizing different view options. Along with additional basic user interface overviews, it will also guide you through creating visually-stimulating documents from scratch or from templates.
