

Swift for iOS, Part 1 of 2: Basics

page 1

Meet the expert: Jordan Hudgens has certifications for Ruby on Rails, Thinkful; Ruby on Rails, Bloc.io; Front End Development, Thinkful; and AngularJS, Thinkful. He is currently vice president of engineering for TRACKR in Midland, Texas and is working on his PhD in Computer Science from Texas Tech. In addition to Ruby, Jordan works with PHP, JavaScript, MySQL, Postgres, CSS3, C, C++, C#, Objective-C, and Python. He also works with the frameworks Rails (Ruby), Zend (PHP), and Django (Python), plus the libraries AngularJS, jQuery, and Backbone.js.

Prerequisites: This course requires some knowledge of using a Mac UI. Anyone with moderate computer end-user experience should be able to take this course.

Runtime: 01:38:47

Course description: In this course we are going to give you a thorough introduction into Apple's most exciting programming language, Swift. You'll gain a better understanding of why Swift exists as well as why many developers are moving towards it for iOS and OS development. Next you'll be taught the basics of Swift programming concepts ranging from constants and variables, arrays and dictionaries, conditionals, loops, functions, and more.

Course outline:

Introduction and Background

- Introduction
- Author's Introduction
- Goals
- Content Overview
- Introduction to Swift
- Swift Background
- Swift vs. Objective-C
- Summary

Environment Configuration

- Introduction
- An Introduction to Xcode
- Setting up the Environment
- Demo: Download Xcode
- Primer: Hello, World
- Demo: Hello, World
- Summary

Constants & Variables

- Introduction
- Constants & Variables
- Demo: Constants & Variables
- Demo: String Interpolation
- Demo: Dynamic Typecasting
- Demo: Concatenation
- Demo: Multiple Values
- Summary

Arrays & Dictionaries

- Introduction
- Arrays & Dictionaries
- Demo: Xcode Keywords

- Demo: Arrays & Dictionaries
- Demo: The Dictionary Explained
- Demo: Using the Dictionary
- Summary

Conditionals

- Introduction
- Conditionals
- Demo: Conditionals
- Demo: Multiple Conditionals
- Demo: Switch Statements
- Summary

Loops

- Introduction
- Loops
- Demo: For-In Loops
- Demo: While Loops
- Demo: Do-While Loops
- Demo: Loops & Conditionals
- Summary

Functions

- Introduction
- Functions
- Demo: Functions
- Demo: Passing in Arguments
- Demo: Multiple Return Types
- Summary
